## **TOURISM AND MOBILITY SYSTEMS SET**

### **Coordinated by Philippe Violier**

At the heart of “tourismophobia”, past and present, is the question of the masses and the differentiation between those who call themselves “travellers”, denying their own tourism, and tourists.

*Tourismophobia* studies the persistence of the repulsion for them, and though their number is infinitely greater today, they are no longer socially the same and practices have radically changed. This book brings this cultural invariant out of the shadows to understand the driving forces behind this social posture, which has taken a new turn with climate change.

Without overlooking the negative effects of tourism, this book is a response to the current debate on “overtourism”, which is the most contemporary form of tourismophobia.

**Jean-Christophe Gay** is a geographer and a full professor at the IAE Nice, Graduate School of Management (Université Côte d’Azur, France). He is a member of the URMIS laboratory and is Scientific Director of the Institut du Tourisme Côte d’Azur.
